free-cooling

R410A

Air/Water chillers for outdoor installation with free cooling
Scroll compressors, plate exchangers and axial fans
Cooling capacity from 196÷452kW

- **HIGH EFFICIENCY VERSION**
- **HIGH EFFICIENCY ALSO AT PARTIAL LOADS**
- **SYSTEM SIDE INTEGRATED HYDRONIC KIT OPTION**

Characteristics

The NRL free cooling are chillers, designed and manufactured to meet air conditioning requirements in residential/commercial buildings or to meet refrigeration requirements in industrial facilities.

They are outdoor units with scroll compressors, axial fans, external copper coils with aluminium fins and plate exchanger.

These chillers are also equipped with a Free cooling coil and are used when the refrigerant load request persists even during the winter months, or when the outdoor air temperature is below the temperature of the return liquid from the system. In Free cooling operation (mixed Free cooling and compressors, or Free cooling only), the fluid is cooled directly by the outdoor air, allowing even the complete shutdown of compressors with a significant energy saving. It is also possible to have the Glycol free version for all those applications where the use of glycol is not allowed

Versions

NRL_FA High efficiency

NRL_FE Silenced

NRL_BA High efficiency without the use of glycol

NRL_BE Silenced without the use of glycol

Operating range: Work up to 44°C of outdoor air temperature at full load. For further details refer to the selection software/technical documentation.

- Unit with two refrigerant circuits designed to provide maximum efficiency at full load, ensuring high efficiency at partial loads also and ensuring continuity in case one of the two circuits stop.
- Flow switch, water filter and standard high and low pressure transducers
- Possibility of integrated hydronic kit that encloses the main hydraulic components; it is available in different configurations with or without storage, one or two high static pressure pumps
- Three-way valve located on the water side for water switching on the Free-Cooling coils
- Device for electronically controlling the series condensation, for operation even at low temperatures or in free cooling, which allows

adjusting the air flow rate to actual system demand with resulting advantages in terms of consumption reduction.

- Microprocessor adjustment, that allows isolating the condenser coils to maximise the free cooling efficiency, even in mixed Free cooling and compressor operation
- Complete, with keyboard and LCD display, for easy consultation and intervention on the unit via a menu available in several languages.
- The presence of a programmable timer allows setting time bands of operation and a possible second set-point
- The temperature control takes place with the integral proportional logic, based on the water output temperature.
- Night Mode: it is possible to set a silenced operation profile.

Perfect for night operation, since it guarantees greater acoustic comfort in the evenings, and a high efficiency in the time of greater load.

Accessories

- **AER485P1:** RS-485 interface for supervising systems with MODBUS protocol.
- **PGD1:** Simplified remote panel. Allows performing the basic controls of the unit with alarm signals.
- **MULTICHILLER_PCO:** Control, switch-on and switch-off system of the single chillers where multiple units are installed in parallel, always ensuring constant flow rate to the exchangers.
- **AERWEB300:** the AERWEB device allows the remote control of a chiller by means of a common PC through Ethernet connection, via a common browser; 4 models available:

AERWEB300-6: Web server for monitoring and controlling maximum 6 RS485 network devices;

AERWEB300-18: Web server for monitoring and controlling maximum 18 RS485 network devices;

AERWEB300-6G: Web server for monitoring and controlling maximum 6 RS485 network devices with integrated GPRS modem;

AERWEB300-18G: Web server for monitoring and controlling maximum 18 RS485 network devices with integrated GPRS modem;

- **GP:** Protection grids for coils and cooling circuit.

- **VT:** Group of anti-vibration mounts.

Accessories mounted in the factory;

- **DRE:** Peak current reduction electronic device. **Only available with 400V power supply.**
- **RIF:** power factor correction, connected in parallel to the motor, it allows a reduction of the input current (approx. 10%).
- **PRM1:** Manually-rearmed pressure switch, wired in series to the high pressure switch on the flow pipe of the compressor.

Unit Configurator

By suitably combining the numerous options available it is possible to configure each model in such a way as to meet even the most demanding of system requirements.

Field Description

1,2,3 **NRL**

4,5,6,7 **Sizes**

0800-0900-1000-1250-1404-1504-1655-1800

8 **Scope of application**

- Standard (temperature of water produced up to +4 °C)
- Y Low temperature (temperature of water produced from +4°C to -8°C)
- X Electronic thermostatic valve (temperature of water produced up to +4 °C) for different temperatures, contact the supplier

9 **Model**

- F Chiller with Free cooling
- K Chiller with Free cooling and low pressure drops
- B Chiller with Free cooling glycol free

10 **Heat recovery**

- Without heat recovery

11 **Version**

- A High efficiency
- E Silenced high efficiency

12 **Coils**

- Aluminium
- R Copper
- S Tinned copper

- V Painted

13 **Fans**

- Standard
- J Inverter

14 **Power supply**

- 400V/3/50Hz with magnet circuit breakers

15-16 **System side integrated hydronic kit (2)**

- 00 Without hydronic kit

- 03 Storage tank with 1 high static pressure pump

- 04 Storage tank with 2 high static pressure pumps

- P3 1 High static pressure pump

- P4 2 High static pressure pumps

(2) In models glycol free "B" option kit hydronic system side is not available:

- In sizes 0800 to 1800 option 03/04

Sound power

Aermec determines sound power values in agreement with the Standard UNI EN ISO 9614-2, in compliance with that requested by Eurovent certification.

Sound Pressure

Sound pressure measured in free field, 10 m away from the unit external surface (in compliance with UNI EN ISO 3744).

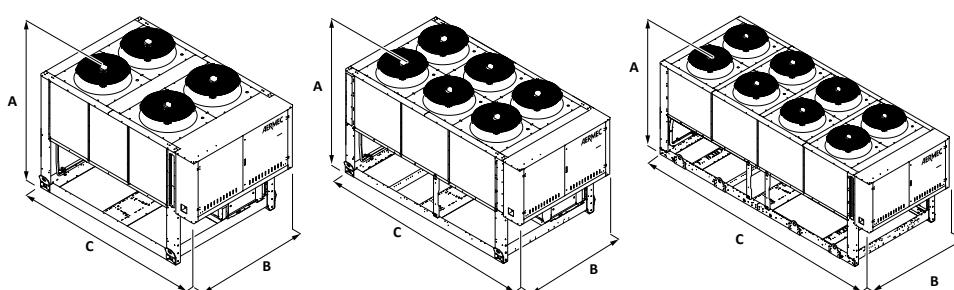

Note: For further information, refer to the selection program or to the technical documentation on www.aermec.com
